## Claims: I claim:

- A cover for electric hair clippers and trimmers, comprised of a neoprene fabric casing to cover said electric hair clipper or trimmer tool that will prevent distraction or discomfort caused by the heating up of the hair clipper.
  - 2. The specific type of neoprene is called sharkskin and this fabric is sewn together on one side to form a glove or sleeve.
  - The sharkskin neoprene has one side of rubber that is to be the inside of the glove or sleeve.
  - 4. The glove or sleeve has three openings; one on top to expose the blade, one on bottom to expose the electric cord and one at the base to expose the on/off switch.
  - During the use of the clipper/trimmer, the user of said clipper/trimmer will be protected from the heat of the clipper/trimmer during a haircut.
  - 6. The utilization of the glove or sleeve prevents interruption the haircut and does not sacrifice a safe and secure grip on the clipper/trimmer.
  - 7. The glove or sleeve offers continuity and effective completion of the haircut without the need for interruption or the purchase of more than one of the same haircutting tool.
  - The glove or sleeve has a three quarter trapezoid cut out to expose the logo or brand name of the electric clipper that it surrounds.
  - 9. The exterior nylon casing comes in a variety of colors.
  - 10. The glove or sleeve incorporates one stitch up the backside to form the fabric in a cylindrical shape.
